Description:

HEINRICH OCM100 rang Line Array Speakers come with such sound enhancing benefits as clear sound, excellent directionality of focus on the listening area, and transmission of clear, even sound over a distance, thanks to a low degree of sound attenuation. These speakers are well-suited for medium-sized mainly speech applications where clear, uniformly dispersed sound that is audible at a distance is essential, such as conference centers, houses of worship and railway stations, or venues with highly reflective interior surfaces. The line array speakers work to provide high quality sound even when an equalizer is not used. The speaker units come in a slim, energy-efficient and cost-effective design, with a body that is narrower than earlier versions, so they are well-suited to a wide range of venue indoor & outdoor. best application in class rooms, airport, railways and large open area with indoor and out door applications, HEINRICH OCM100 Column line array speaker have polypropylene drives
